

PHYSICS
Mechanical Engineering Technology
Engineering Physics I
203-943-DW (all sections)
Winter 2017

Teacher **Andrew Stewart** 7A.24, local 4024,

Teaching methods The material will be presented using a mix of active learning activities, lectures, in-class problem solving, laboratory experiments and demonstrations. Laboratory periods will be used for experiments as well as class tests and lectures.

Attendance & participation Although class attendance is not compulsory, students should make every effort to attend all classes. In the event that a class is missed, the student is responsible for all material covered or assigned during that class. **Attendance during laboratory experiments and for class tests is however compulsory.** In the rare event that a student for valid reason (*e.g.* due to an intensive course, illness, *etc.*) is or anticipates to be absent during a laboratory experiment or for a class test, the student **must**, where possible, inform the teacher and provide the necessary documents before the absence or, at the latest, on the day of their return. If the absence is excused, students will have the opportunity to complete the assessment. All other assessments (readings, quizzes, lab activities, *etc.*) missed due to absence are:
assigned a grade of zero where the absence is not excused;
given zero weight in the calculation of the final grade where the absence is excused.
For additional information regarding attendance, students should refer to the Institutional Student Evaluation Policy (ISEP section IV-C).

Literacy standards It is expected that students will be able to comprehend the course material and express themselves appropriately as a normal part of their academic performance in the course. Marks may be deducted for inadequate communication skills.

Laboratory work Experimentation is an essential part of science. Students will be expected to perform experiments and report on their results. Your teacher will provide you with instructions for lab experiments and activities (there is no manual to purchase). **Students must be present during the entire lab activity to receive credit.**

Student conduct Everyone has the right to a safe and non-violent environment. Students are obliged to conduct themselves as stated in the Student Code of Conduct and in the ISEP section on the roles and responsibilities of students (ISEP section II-D). Disruptions or excessive noise will not be tolerated. Students who do not comply with these rules will be asked to leave the class and may be referred to Student's Services for disciplinary action. **Mutual respect is the key to a harmonious learning environment.**

Academic integrity Cheating, copying, or any other form of academic dishonesty will not be tolerated. Students should acquaint themselves with the policy of the College on plagiarism and cheating. According to ISEP, the teacher is required to report to the Sector Deans Office (486-4830) if a student is suspected of cheating. **Academic integrity is the key to a successful learning environment.**

Course content

The material to be covered is contained in the following chapters and sections of the text.

Weeks	Topics	Chapter & Section
1	Introduction: Units and unit conversions	Ch.1: 1{4
1	Introduction: A review of mathematical concepts	Ch.1: 5{11
2	Vectors and forces	Ch.2: all
3	Moments and couples	Ch.3: all
4{5	Equilibrium and force systems	Ch.4: all
6{8	Structures and members	Ch.5: all
9{10	Friction	Ch.7: all
11{12	Centroids and centre of gravity	Ch.8: all
13{15	Moment of inertia	Ch.9: all

Questions outside class

All regular day program teachers will be available in their respective offices to their students during posted office hours. In the first week, your teacher will inform you of their schedule and will post it outside their office.

Room 7A.1 is the physics study room. At scheduled times, a teacher or peer tutor will be on duty there to answer your questions. The schedule of teachers and peer tutors will be posted outside of 7A.1 in the 2nd or 3rd week of term.
