
PROJECT 2 SELF EVALUATION

Name:

EXPLANATION

Write a paragraph on the reasons you can give as to why you are satisfied regarding the completion of the project. You will need to write statements supporting the numerical grade values that you assign to each component. This is not a test of your knowledge of the course content. It is a test of your ability to reflect on your own work and your answers. There are no right or wrong answers. Self-reflection is an important skill for you to evolve and improve your standing on. Write both yourself and the methods of product design development. Continue writing on the back of your paper if needed.

SELF EVALUATION

OVERALL PROJECT EVALUATION: / 5

1. In general, how do you feel that you performed with this project overall? What grade would you assign yourself on a scale of 1 (low) to 5 (high)? Please give reasons supporting your answer and grade selection (min. 150 words).
2. How satisfied are you with the results of your project? Please provide a brief explanation of your satisfaction level (min. 150 words).
3. How would you rate your experience, now that you have completed the project?

RESEARCH COMPONENT

How comfortable were you with having to research background information regarding your product choices? Did you find it a challenge? Why?

DESIGN INTENT & CONCEPTS

1. From your research, sketches taken from sample product(s), and survey feedback, were you able to synthesize the information together into a design intent that "adds value in some way(s) to your design concept(s)?"
2. You generated numerous concepts. How do you feel that you did with creating your concepts? Did you find it to be challenging? Did you enjoy the process? From this project experience, how do you think that you might work on concept generation in the future?

TIME MANAGEMENT

1. Throughout the duration of the project, do you feel that you were able to manage it to your satisfaction from phase to phase within the time allotted? If 'yes', why? If 'no', why not?

2. Based on your answer to number one above and your experience, what would you do differently to improve on time management if you were to do the project again?

OUTCOMES

1. Practice writing clearly and freely.
2. self-reflection about the project and the progressively more complex experience of
3. Provide students with the opportunity to identify and resolve questions or problems related to the content with students.

VALUE

501 course objectives
